

Hello America!

Double Hung VS 600

system dedicated for the American
and British market already in our offer.

www.arkawindowsdoors.com

Vertical sliding windows **VS 600** – new in our offer. It is a traditional style of casement windows combined with the advantages of a modern aluminum profile, guaranteeing the best thermal parameters. Double Hung windows can be glazed with two and three pane packages.

The system is equipped with a high-quality seal and hidden dehydration. The **VS 600** system has great structural capabilities. In addition to the vertical sliding sash, it has a "tilt" function that makes it easier to clean windows.

The outer frame with a square cross-section and wing connections, which require minimal processing, considerably simplify the assembly of windows.

Technical specification:

- U-value = 0.28
- max. vertical sliding width – 63" (based on frame height 51")
- max. vertical sliding height – 110" (based on the frame width 29")
- max. vertical sliding weight – 110 lb per wing
- glazing with packages up to 1.10"
- frame construction depth – 5"
